

1st Division

Crews in the first division will be marshalled at the start and be expected to be in position by 13.45. i.e marshalled in racing order after grassy corner, facing upstream.

2nd & 3rd Divisions

Crews are expected to have marshalled and be in position along the meadows side of the river after Chesterton at least 30 minutes before the division is scheduled to go off. Crews will be marshalled in reverse racing order. 20 minutes before the division is due to start, crews will be asked to row up to the start and spin in the gut so that they are in racing order. Once all crews are spun, the division will be started.

The Finish

It is very important that after crews pass the finish line, that they continue rowing and head back to their boathouse immediately. Both the start and finish of the race will be indicated to the crew by a whistle or beep from a megaphone when the bow crosses the respective line.
